An Assertive person and would like to be committed and efficient in my work and enhance the growth of the organization by improving and applying my competency at work.

PROJECTS

Fake News Prediction Using Machine Learning

- Developed a fake news detection system using ML algorithms (Naive Bayes, Logistic Regression) and NLP techniques.
- Processed and cleaned large text datasets, applying TF-IDF feature extraction.
- Improved accuracy through model tuning and validation, enabling effective misinformation detection.
- **GITHUB:** <https://github.com/Vickkash/fake-news-prediction.git>

Blood Group Detection Using Fingerprint

- Developed a non-invasive blood group prediction system using fingerprint pattern analysis.
- Applied OpenCV-based image processing and trained ML models to identify blood type patterns.
- Designed as a fast, affordable solution for rural and emergency healthcare.
- **GITHUB:** <https://github.com/Vickkash/blood-group-detection.git>

Kaithiran: Web Application For Rural Vendors

- Built a full-stack mobile application enabling rural artisans and small businesses to sell products directly without middlemen.
- Implemented using React Native, Node.js, Firebase (DB), Razorpay (payments), and Nodemailer (emails).
- **GITHUB:** <https://github.com/Vickkash/kaithiran-web.git>

CERTIFICATION

- Oracle Apex Cloud Developer
- Java SE17 Developer
- Getting Started with Deep Learning (NVIDIA)

ACHIEVEMENTS

- Winner in Hackvotrix'25
- Handball CM Trophy 2025 Winner
